

UNIVERSITAS
ISLAM
INDONESIA

Visiting Professor

For over 70 years, we have committed to nurturing students to be innovative global leaders. The national rankings place us as number 1 for private universities in Indonesia and among the leading universities nationally (2018). The QS Asia University Rankings place us among top 500 in Asia (2019).

INSPIRATIONAL LEARNING

As a higher education institution, developing strategic collaboration is part of UII's strong commitment to play an active role in developing a global partnership.

We open up opportunities for professors and experts from partner institutions to collaborate with us in nurturing and developing young minds at Universitas Islam Indonesia (UII) and contribute to the wider community through various activities such as public lectures, community development, or other training programs.

This opportunity is not only open to academics, but also for professionals in business and industry, as well as government officials both at the regional, national and international level. UII continue to encourage lecturers to improve their quality of teaching through various training for capacity building and supporting the international teaching collaboration program.
